HBFI Open Data Publication Plan 2026 – 2028

October 2026

Context

The 2019 EU Open Data and Re-use of Public Sector Information Directive was transposed into Irish law by the Open Data and Re-use of Public Sector Information Regulations 2021.

HBFI is a public sector body for the purposes of these Regulations and is committed to making appropriate non-personal data available for re-use in accordance with the principles of open data.

HBFI publishes information through its website, Freedom of Information Publication Scheme and the Open Data Portal. This Plan sets out the actions to support the identification, publication and ongoing maintenance of datasets suitable for open publication.

Planned Actions 2026 - 2028

The HBFI Open Data Liaison Officer has conducted a review of the 2024–2026 Plan and identified opportunities to further develop HBFI's Open Data arrangements.

Below sets out the actions to support the identification, publication and maintenance of HBFI datasets:

1. Review HBFI's current Open Data position and establish an Open Data Register.
2. Identify and prioritise datasets suitable for publication.
3. Publish approved datasets on the Open Data Portal.
4. Maintain the Open Data Register and published datasets, undertaking a formal annual review and updating datasets as required.
